

Khairul Anuar Aliasak

Mobile Apps Developer

+60166250587

rekabytes.dev@gmail.com

Summary

Full stack and mobile developer building web applications, cross-platform apps and API integrations with React, Next.js, Node.js, React Native and Expo. Experience includes stock research apps, subscriptions, e-commerce and public APIs, with a background in graphic design and user-focused interfaces.

Work Experience

Mobile Apps Developer Apr 2025 - May 2026

Lattice IO

• Engineered a high-performance, cross-platform mobile application using React Native and Expo, maintaining a unified codebase for iOS and Android to accelerate feature delivery

• Implemented a tRPC-powered monorepo for type-safe communication between the mobile frontend and backend.

•Streamlined user lifecycle management by integrating Logto for secure authentication and handling complex callback flows

• Integrated RevenueCat to manage in-app purchases and subscription logic across iOS and Android.

• Delivered over-the-air application updates using React Native Stallion across the shared mobile codebase.

• Developed interactive financial visualizations with React Native Chart Kit for stock research and portfolio tracking.

Freelance Fullstack Developer Jan 2026 - Mar 2026

PixelForge-GG

• Spearheaded the development of a comprehensive, all-in-one esports platform targeted at the Malaysian gaming community

• Developed a Discord-like community feature hosted on KVM VPS infrastructure, using a Next.js frontend and Node.js backend for the Malaysian gaming community.

•Streamlined the development lifecycle by implementing a high-performance monorepo structure utilizing pnpm and Turborepo for highly efficient build caching

•Leveraged Next.js and a Node.js backend, alongside Docker containerization, to

ensure rapid deployment and robust application stability

Freelance API Developer Dec 2025 - Feb 2026

techapi.my

• Engineered a public RESTful API providing halal food calorie data for local Malaysian products

• Implemented Redis for API response caching with 24-hour TTLs to reduce database requests and manage external API rate limits.

Freelance Fullstack Developer Apr 2025 - Jul 2025

Oral Hous Empire

• Developed a complete, end-to-end e-commerce ecosystem specializing in dental and oral care products, encompassing a web storefront, an administrative dashboard, and native iOS/Android applications

•Built dynamic, type-safe frontend interfaces using React and TypeScript, powered by a scalable Node.js backend and deployed seamlessly via Netlify

•Integrated Supabase as a backend-as-a-service to handle robust database management and secure user authentication across all platforms

•Implemented core e-commerce functionalities, including detailed product catalogs, user-friendly shopping carts, and secure payment processing pipelines

Graphic Designer May 2022 - Dec 2023

Evomania Sport Sdn Bhd

• Instructional Storyboarding: Crafted detailed storyboards for video content to ensure logical flow and effective knowledge transfer, aligning visual narratives with specific communication goals

•Educational Media Production: Spearheaded the creation of video advertisements and digital assets, utilizing videography and design to represent complex brand information in an accessible format

•Digital Learning Infrastructure: Instrumental in developing and maintaining the brand's website, focusing on intuitive digital brand representation and user-centric navigation

•Visual Communication Strategy: Designed and executed social media assets and marketing strategies to engage diverse audiences through clear, compelling visual storytelling

•Event & Workshop Documentation: Managed event videography for product launches, capturing real-time demonstrations to be used as instructional and promotional resources

Social Media Designer Jan 2021 - Feb 2022

Nara Space

• Instructional E-book Development: Authored and designed comprehensive e-book tutorials for Shopee Seller Centre, translating complex e-commerce workflows into

step-by-step visual guides for new sellers

•Visual Learning Modules: Developed structured "how-to" content that simplified high-density information—such as order fulfillment and inventory management—into accessible digital lessons

•User-Centric Tutorial Design: Created interactive-style layouts and cohesive visual assets to reduce learner frustration and improve the speed of platform adoption

•Multimedia Knowledge Delivery: Integrated graphic design principles with instructional storytelling to ensure tutorial content was both aesthetically professional and pedagogically effective

Sublimation Designer Apr 2020 - Jan 2021

Purecolor Sdn Bhd

Working as a contract graphic designer for sublimation printing

Internship Junior Graphic Designer May 2019 - Mar 2020

Brandhub Malaysia

With extensive experience as a Graphic Designer for a product manufacturing company, I have been instrumental in creating comprehensive brand identities, including labeling, packaging, off-set printing, and social media assets. Notably, I have worked on projects for renowned brands such as Mixy by Zahirah MacWilson and Cocoon Vape, showcasing my versatility across various product lines. Additionally, I have honed my skills in product photography to enhance product branding, demonstrating a well-rounded expertise in the field of product branding and design

Education

Bachelor's degree studies in Information Technology

Universiti Kuala Lumpur (UniKL)

Focus on Software Engineering, with a foundation in software development, web development, and database management. Applied HTML, PHP, MySQL, JavaScript, and CSS in projects, including dynamic and responsive web applications.

Pre-University (A-Levels, Foundation, Diploma or equivalent) 2019

Politeknik Sultan Mizan Zainal Abidin

Projects

Hibiscus - AI Agentic TUI 2026

https://github.com/Rekabytes-Enterprise/hibiscus

Rust · Pi coding agent

A Rust terminal interface for the Pi coding agent, with model switching, resumable sessions, image prompts, and in-terminal workflow controls. Pi handles model access, authentication, tools, agent runs, and session persistence.

Reka Bytes - Personal Website and Portfolio 2026

https://reka-bytes.my

Personal website showcasing software projects, public repository links, technical articles, and contact options for collaboration.

Built a Git-based publishing workflow using Markdown posts and structured frontmatter, with content published through deployment.

Mokara - team workspace

https://mokara.my

Shared workspace for small teams combining task and project management, comments, attachments, subtasks, and progress tracking.

Added Model Context Protocol (MCP) integration with 41 permission-scoped tools, enabling AI agents to manage tasks, projects, and KPIs, and publish or synchronize GitHub issues. Supports remote Streamable HTTP connections, OAuth/PKCE authorization, and workspace- and repository-scoped access.

TryLattice - Android and iOS apps

https://trylattice.io

Android app iOS app

Developed a cross-platform mobile app for AI-powered stock research and portfolio tracking using React Native and Expo. Integrated tRPC, Logto authentication, RevenueCat subscriptions, React Native Stallion OTA updates, and interactive financial charts.

TechAPI - Malaysian Food Nutrition API 2025

https://techapi.my

Built a public food-calorie API and lookup app for Malaysian foods and products, including JAKIM-verified halal products. Powered by official KKM (Ministry of Health Malaysia) data, the platform lets users search nutrition values and integrate them into their own apps.

oral-hous - you dental supply 2025

https://oral-hous.com/

• Oral-Hous.com I developed a comprehensive e-commerce platform for Oral-Hous.com, specializing in dental and oral care products. This project encompassed the creation of a robust e-commerce website, an intuitive admin dashboard, and native Android and iOS mobile applications

Bujin's Batik Website Development 2024

For my final year project, I created a responsive website for my portfolio, showcasing my skills and projects. The website, Bujins Batik, was developed using a combination of HTML, PHP, MySQL, JavaScript, and CSS. This project demonstrates my ability to integrate front-end and back-end technologies to build a dynamic and user-friendly website. It highlights my proficiency in web development and my commitment to creating visually appealing and functional web solutions

How to buy from Ideal Tech 2023

https://youtube.com/shorts/UfLa-azBVt8

I led the creation of a storytelling video demonstrating the step-by-step process of purchasing from Ideal Tech via their website. This project involved crafting a compelling narrative to guide users through the purchasing journey, effectively showcasing the ease and convenience of buying from Ideal Tech

Manic Studio Promotion Video 2023

https://youtube.com/shorts/QJ6cVCMQJyE

I spearheaded the production of a promotional video for Manic Studio, a sub-company of Evomania Nutrition, showcasing their boxing classes. By recording an actual class, I provided viewers with an immersive insight into the energy and dynamics of the sessions, aiming to ignite their excitement and interest in joining the classes

Arc A750 Promotion 2023

https://youtube.com/shorts/49ZnDCmjjYE

As a freelance video editor, I crafted a promotion video for Ideal Tech, focusing on the vibrant world of esports. The video highlighted the company's commitment to staying updated with the latest trend games, ensuring users are consistently in touch with the evolving gaming landscape

Aquatwo Ride ft Burnz (Evomania Nutrition) 2022

https://youtu.be/5V3nWsN2GIA

I took on the role of videographer and storyline developer for the AquaTwo Ride Series, aiming to deeply engage viewers with the product through compelling storytelling. This project allowed me to showcase my proficiency in visual storytelling and videography, contributing to an immersive and captivating product advertisement experience
